Education

Indian Institute of Information Technology and Management, Gwalior

Nov 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.15)

Gwalior, India

Experience

Software Developer Backend Intern

Jan 2026 – Jun 2026

Razorpay

Bengaluru, India

- Delivered the **payment.notes.updated** webhook end-to-end across **10+** **microservices**, owning the full lifecycle from **Protobuf** schema definition and **Kafka** event streaming to webhook delivery and rate-limit enforcement — enabling merchants to receive real-time payment note change notifications at scale.
- Engineered the **Subscription Reactivation** feature end-to-end: implemented the reactivation endpoint in the Subscriptions service, proxied it through the API monolith, provisioned the **Kong** gateway route with user-auth, and authored the **authz** policy for merchant dashboard access — reducing merchant support escalations for lapsed subscriptions.
- Accelerated CI/CD reliability by authoring **SLIT** integration test suites for **PG Router** across multiple order and payment flows, consolidated Docker images to eliminate duplicated pipeline overhead, and instrumented distributed tracing via **OpenTelemetry** — improving observability across payment routing workflows.

Google Summer of Code (GSoC) | Software Engineer Intern

May 2025 – Aug 2025

OSGeo

Remote | Certificate

- Eliminated **95%** of manual deployment errors for istSOS4 by engineering a graphical Docker deployment wizard, making previously error-prone infrastructure setup reproducible and accessible to non-expert users.
- Architected a full-stack wizard using **React.js** and **Electron.js** that programmatically generates validated **docker-compose** configurations, cutting environment setup time significantly by **85%** and improving cross-platform deployment reliability.
- Implemented real-time form validation ensuring **100%** configuration correctness at setup time, preventing downstream deployment failures caused by misconfigured service parameters.

Cyber Security Intern

Nov 2024 – Dec 2024

C-DAC

Noida, Remote | Certificate

- Identified and remediated critical security vulnerabilities across web applications using **OWASP Top 10** methodology, directly strengthening the security posture of production systems.
- Uncovered **5+** **critical data exposure points** by conducting infrastructure reconnaissance using OSINT tools (**SpiderFoot**, **Netlas**), surfacing risks that were previously undetected in routine assessments.
- Translated technical findings into actionable mitigation reports that were adopted into the organization's **secure software development lifecycle**, creating lasting process improvements beyond the internship.

Technical Skills

Languages: Go (Golang), C/C++, Python, TypeScript, Java, JavaScript

Back-End & APIs: Node.js, Express.js, REST APIs, gRPC, Webhooks, WebSockets

Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis

Front-End: React.js, Next.js, Redux, Tailwind CSS, Electron.js

Infrastructure & Tools: Docker, Kubernetes, Kafka, OpenTelemetry, Git, CI/CD, Sentry

Security: Penetration Testing, OWASP Top 10, OSINT

Projects

Notify - Notes Management Platform | React.js, Node.js, Appwrite, OpenAI

Jul 2024

- Engineered a feature-rich note management system that increased user productivity through streamlined note creation and organization.
- Optimized backend API endpoints and database queries to design a **scalable** system, reducing note-saving latency and enhancing application responsiveness.
- Integrated a chatbot using the **OpenAI API**, providing on-demand support and boosting user engagement.

Remote Code Executor - IDE | React.js, Node.js, Socket.io, Docker

Feb 2024

- Architected a system for real-time collaborative coding using **Socket.io** for WebSocket communication, enhancing pair-programming efficiency.
- Designed a secure, multi-language code execution engine, creating a robust and **scalable** environment for concurrent users.
- Containerized the full-stack application with **Docker** to automate deployment, reducing onboarding time by **95%**.

Achievements / Positions of Responsibility

- Selected for **Google Summer of Code (GSoC) 2025**; one of the highly competitive candidates chosen from over **15,240** global applicants (**8.4%** acceptance rate).
- Demonstrated strong proficiency in **data structures and algorithms** by solving **1000+** problems on LeetCode; ranked in the top **0.5%** in Weekly Contest 457.
- As **Web Advisor** for the IEEE Student Branch, co-led two international conferences and over ten workshops, showcasing leadership and community involvement.
- Secured a **99.02 percentile** in JEE Mains against 1.2 million candidates, demonstrating strong analytical and problem-solving skills.
